

MANUKA HONEY

Manuka honey is collected by bees in very few regions of New Zealand which continue being natural resorts of the rare *Leptospermum scoparium* shrubs (manuka shrubs).

An extraordinary honey with a refined, rich taste and higher therapeutic properties than any other type of raw honey in the world.

Contains methylglyoxal (MGO), recognised by scientists as a natural antibiotic that inhibits the multiplication of bacteria, fungi and viruses.

Currently, research is being carried out on the possibility of using manuka honey as a supporting therapy in the treatment of respiratory diseases, including serious diseases such as cystic fibrosis.

Studies have confirmed that manuka honey has a strong effect on influenza and chickenpox viruses, inhibiting their multiplication. It has also been proven to inhibit the growth of some oral pathogens and to have a supporting effect in preventing gingivitis and plaque formation. Bacteria causing respiratory diseases are also susceptible to the effects of manuka honey.

ARKONA

MANUline

An exclusive line of products based on a **certified manuka honey**. The substances contained in MANUline products have a positive effect on the respiratory and immune systems, increasing the **overall immunity of the body**. The unique properties of the products result from **methylglyoxal (MGO)**, a natural ingredient found in significant amounts only in manuka honey.

MANUshot

liquid dietary supplement based on manuka honey*

Product description

The substances contained in the product ensure its effectiveness in conditions of weakened immunity and in various types of upper and lower respiratory tract infections.

Manuka honey

having a protective effect in infections of the upper and lower respiratory tract

Marshmallow

soothing and moisturising the mucosa of the upper respiratory tract

Iceland moss

supporting the proper functioning of the respiratory system

strengthening the body's immunity

Zinc

supporting the proper functioning of the immune system and protecting cells against oxidative stress

Dosage

10 ml (a shot) 3 times a day

- intended for adults and children over 3 years of age
- do not use in the case of hypersensitivity to any of the ingredients
- contains sweeteners

***The product is available also as MANUspray (dietary supplement in the form of a spray, based on manuka honey)**

ARKONA

MANUgel

gel dietary supplement based on manuka honey

Product description

-  The base of the product is certified manuka honey (min. 100+ MGO), natural fruit juice, natural polysaccharide hydrocolloid and preservatives.
-  Our light gel is produced in the technological process, and, in texture and taste, it resembles a delicate fruit mousse.
-  It is also an excellent carrier of active ingredients, in particular: vitamins (including - A, D, E, K), minerals (micro and macroelements) and many other substances, which are necessary for the proper functioning of the human body.
-  The simplicity of dosing, smooth texture and pleasant taste make MANUgel a great choice for children and people who find it difficult to swallow tablets and capsules.

Dosage

1 teaspoon (5 presses of the dispenser) 3 times a day

- intended for adults and children over 6 years of age
- do not use in the case of hypersensitivity to any of the ingredients
- contains sweeteners
